Professional Summary

Versatile Software Engineer specializing in full-stack architectures, enterprise backend systems, and Generative AI application development. Experienced in designing secure RESTful APIs, engineering scalable web logic using ASP.NET Core MVC, and orchestrating intelligent automation workflows with modern LLM frameworks. Adept at translating complex business requirements into high-performance, clean-code solutions within Agile environments.

Professional Experience

Programmer Analyst Trainee

Jan 2026 – Present

Cognizant Technology Solutions

Chennai, India

- Engineered core modules for an enterprise-level Banking Customer Onboarding & KYC Compliance system within a .NET Core ecosystem.
- Implemented complex business logic covering customer registration, digital document tracking, simulated risk engine scoring (Low/Medium/High), and automated multi-step account approval workflows.
- Designed and normalized relational database schemas in SQL Server using an Entity Framework Core Code-First approach, ensuring data validation and strict transactional integrity.
- Developed structured, authenticated RESTful API endpoints utilizing a clean Controller-Service-Repository multi-layer architecture.
- Managed codebase updates, versioning, and continuous feature integration locally using Visual Studio and structured Git/GitHub branching strategies.

AI & Frontend Development Intern

Apr 2025 – Jan 2026

Revive Tek Solutions

Hyderabad, India

- Architected responsive AI-driven CRM platforms and intelligent Applicant Tracking System (ATS) dashboards using React.js and Tailwind CSS integrated with live REST APIs.
- Built production-ready Generative AI automation pipelines for context-aware email drafting, resume parsing, and scheduling optimization leveraging OpenAI APIs and LangChain orchestrations.
- Executed data preprocessing workflows and structured prompt engineering to significantly boost model response accuracy, slashing manual HR pipeline processing efforts by over 30%+.

Projects

Enterprise Multi-Agent IT Support Platform

FastAPI, React, LangGraph, PostgreSQL, ChromaDB, Docker

- Architected an AI-powered multi-agent LangGraph IT support platform, integrating a ChromaDB RAG pipeline for automated issue resolution via semantic search over knowledge bases.
- Developed specialized agents for intent detection and intelligent ticket creation with human handoff, featuring secure RBAC authentication, persistent memory, and Dockerized deployment.

AI-Personalized E-Learning Platform

Node.js, Firebase, Gemini AI, OpenAI API, React.js

- Developed a full-stack generative AI educational prototype featuring intelligent course recommendation systems, adaptive testing, and real-time user progress analytics.
- Deployed an initial release validated by active student users at NIT Warangal, subsequently refactoring the underlying architecture locally to maximize long-term modular scalability.
- Implemented secure Firebase authentication workflows, complex role-based access control (RBAC), and instantaneous real-time database synchronizations.

Technical Skills

AI & GenAI: Python, OpenAI API, LangChain, Gemini AI, Prompt Engineering, Hugging Face

Backend Engineering: C#, ASP.NET Core MVC, Entity Framework Core (Code-First), ADO.NET, RESTful APIs

Frontend Development: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Figma

Databases & Tools: SQL Server, PostgreSQL, MySQL, Git, Docker, Postman

Education

Bachelor of Technology (B.Tech.) in Computer Science and Engineering

2021 – 2025

Vaagdevi College of Engineering (JNTU)

CGPA: 8.00

- Leadership: Appointed as the IEEE Design Chair for the VCE Student Branch, managing design.

Certifications

- Certification:** AI for Everyone – Coursera (Authorized by DeepLearning.AI / Andrew Ng)
- Award:** Best Project Award – Siemens CoE, NIT Warangal
